

### CHARACTERISTICS

- OPERATES UP TO 300 BAR (4350 PSI)
- DIVIDES OIL OR GREASE
- TOP OR SIDE OUTPUTS AS STANDARD
- SINGLE OR DUAL OUTLET SETTABLE BY CENTRAL PLUG
- FULL RANGE OF PRESSURE AND SPOOL MONITORING ACCESSORIES INTERCHANGEABLE WITH SMO PRODUCT LINE
- THE TWO OUTPUTS ARE COMBINED BY REPLACING THE ADAPTER. JUST TAKE ONE ITEM OF STOCK
- SECURE AND CONTROLLED LUBRICATION
- SIMPLE AND FLEXIBLE ASSEMBLY WITH LOW MAINTENANCE COSTS
- BRIGHT LEFT/RIGHT/BOTH ELEMENTS ELIMINATE THE NEED FOR EXTERNAL CROSS PORTING
- DIFFERENT INLET MODULE WITH DIFFERENT HOLES FOR EASY INTERCHANGEABILITY

### APPLICATIONS

- MACHINE TOOLS
- TEXTILES

## METERING DIVIDER ELEMENTS FOR THE VOLUMETRIC DISTRIBUTION OF OILS AND GREASE

Dropsa's **nano-Progressive (nP)** thanks to their compact and solid design are the ideal solution for grease lubrication applications that require small and accurately dispensed quantity of lubricant in a confined space.

Thanks to a patented **RigidLock**, **nano-Progressive (nP)** novel interlocking mechanism between the elements it has the rigidity of a mono-block divider but the flexibility of a modular segmented unit.

**nP** is a distributor that allows the feed flow rate be regulated in order to dispense very precise amounts to diverse outlets by means of the progressive movement of coupled pistons with micrometre-sized gears on the inside of the sliding hole.

The lubrication cycle can be controlled by a single sensor including the Dropsa solid state Ultrasensor product.

These divider elements may be used in a variety of system configurations and have different operating configurations making them flexible for use in multiple applications as a result.

These dividers can be used in a variety of system configurations with different operating configurations making them flexible for use in multiple applications. The compactness makes them particularly suitable for use in confined spaces.

### OPERATING PRINCIPLE

The system can be easily extended and the modular concept provides low cost replacement of component.

The **nP105** metering element (1) pilots a block of 6 metering 0,025 nP delivering elements and one 0,045 nPr.

The **nP105** metering element (2) pilots a block of 4 0,025 nP delivering elements.

The **nP105** metering element (3) directly lubricates two point of the machine.

The cycle is controlled by the Ultrasensor cycle indicator (X).

### RIGIDLOCK

**THE RIGIDLOCK SYSTEMS CREATES A RIGID INTERLOCKING MECHANISM BETWEEN THE ELEMENTS ALLOWING FOR THE QUICK REPLACEMENT AND CORRECT REPOSITIONING OF THE ELEMENT**

## ADVANTAGES

- By combining a reduced space-envelope and maintaining modularity in a single package the nano-Progressive dividers offer many of the features found in top-of-line dividers at a fraction of the cost.
- The RigidLock Systems creates a rigid interlocking mechanism between the elements allowing for the quick replacement and correct repositing of the element;
- A full range of accessories and bridge elements allows for flexible engineering choices.

## TECHNICAL INFORMATION

GENERAL CHARACTERISTICS	
Singular outlet Flowrate	0.0015 cu.inch – 0.0027 cu.inch – 0.0045 cu.inch - 0.0064 cu.inch (0,025cm <sup>3</sup> - 0,045cm <sup>3</sup> - 0,075cm <sup>3</sup> - 0,105cm <sup>3</sup> )
Number of Dividers elements	3 ÷ 12
Working pressure	15bar (218psi) ÷ 300bar (4350psi)
Working temperature	-20°C ÷ +80°C
Material	Nickel-plated steel
Number of inversion at minute	200 max (according to pressure and viscosity)
Inlet thread	1/8" BSP
Outlet thread	1/8" BSP
Lubricants	Min. Oil. 32 cSt –max. 2 NLGI grease

N.B.: The pressure drop is directly proportional to the number of cycles.  
The oil and grease viscosity values always refer to the operating temperature.

## DIMENSIONS

N° elements	INLET nP – standard version mm [inch]				INLET nP -S 20mm reduced hole centers mm [inch]			
	"A"	"B"	"C"	"D"	"A"	"B"	"C"	"D"
3	42 [1.65]	6.2 [0.24]	24 [0.94]	76.3 [3]	20 [0.79]	5.5 [0.22]	30.5 [1.2]	82.8 [3.26]

## SINGLE AND DOUBLE OUTLET CONVERSION

It is possible to combine the two flow rates of the same divider element by replacing the yellow Adapter Part No. 0641709 with the white Adapter Part No. 0641708 as shown in the drawing. When the two outlets are connected, remember to close off the one not being used with a plug (Part no. 3232098)

Sealing disc-washer
